

MARRON CREEK

WINE CO. *Organic*

Located on the Marron Creek Wine Co. property is a series of Marron ponds. Marron are native crayfish species that are exclusively found in Western Australia and only thrive in the fresh pristine waters. Marron are considered a delicacy and are highly prized around the world for their delicate sumptuous flesh.

This symbiotic relational of vineyards and Marron farm could not exist if it weren't for the immaculate management of the entire farm. Our wines are certified organic and reflect the pristine environment of the Frankland River region , where the cool climate and organic viticulture give wines of great freshness and precision.

Marron Creek's winemaker Brian Kent, makes wine that compliments the pristine fruit character that comes from the very southern tip of the Frankland River region.

Marron Creek Chardonnay

Hints of oak, cashew and almond meal are balanced with peach and nectarine, with a touch of mandarin peel and yellow florals.

Marron Creek Syrah

A rich, vibrant syrah made from organically grown fruit. Red berry fruits, balanced with subtle oak flavours of vanilla and spice, leap out of the glass.

Marron Creek Cabernets

A complex mix for briar, cedar and spice initially, followed by ripe mulberries and plum that lift out of the glass with fresh liveliness
