STAY HEALTHY AND
STRONG.

Screening for bowel cancer is simple, private, and free.

A screening test every two years from the age of 50 can help detect bowel cancer early. If found early, over 90% of bowel cancers can be successfully treated. Doing the test every two years is an important way to stay healthy and strong for your family.

For more information, have a yarn with your health provider or Aboriginal and/or Torres Strait Islander health worker about making a bowel cancer screening test part of your regular check-up or visit:
