

Lesson 8

Years

Duration

0-4

1.5 hours

Wastewater soup

Class-based lesson

Your students will learn about :

- What wastewater is
- How liquids and solids are treated
- How we managed wastewater many years ago
- How wastewater is disposed of today

In small groups, your students will filter a class made wastewater concoction separating the liquids from the solids.

Book the lesson

To register interest please email sarah.slater@water.co.nz
