

FLUENT EXPERT SERVICES

Performance Testing Package

Non-functional Readiness

For Clients

The Performance Testing Package is an Expert Services package designed to validate the non-functional aspects of an implementation and support a successful go-live of Fluent Order Management.

Validate Performance Metrics

The Performance Testing Package is a time-and-materials based package evaluating the runtime behaviour of the implementation with a given workload and volumetrics. Performance validation is a critical component of the project delivery to ensure achievement of business goals.

Actionable recommendations for improvements will be provided and discussed with the SI partner and/or customer's implementation team.

WHAT'S INCLUDED?

- ✓ Consulting on testing best practices
- ✓ Consulting on test cases, metrics
- ✓ Support during the test execution and reviewing of Fluent platform metrics
- ✓ Scaling the test environment to production levels
- ✓ Collection of Fluent platform metrics for reporting

WHAT'S NOT INCLUDED?

- ✓ Set up of the test account & smoke tests
- ✓ Execution of the performance tests
- ✓ Remediation of implementation bottlenecks

Deliverables

A Performance Test Report prepared by an Expert Services Consultant, that details concerns or recommendations prior to go-live.

Cost (Time & Materials)

USD \$3,000 per day Expert Services (or local equivalent)

Contracted daily rate for the performance test account

(Cost estimation will be done by your Expert Services and Customer Success contacts)
