

**At Small Things Wine we are focused on a pretty simple philosophy - to make the best wine, sustainably... 'where' you enjoy wine is more important than the container it comes in, whether it's a sunset at the beach, in a tent, an outdoor event, on a hike or even on a plane.**

We are Western Australia's first 100% premium wine in can brand and all our wines are natural - unfiltered, unfined, vegan, low intervention and hand made specifically for can.

# Why cans?

## Sustainable

- Cans reduce carbon emissions by 79%.
- Use less energy to chill, transport and manufacture.
- Cans contain 73% recycled material.
- Cans are part of a closed loop recycling system saving critical natural resources.

## Quality

- Cans provide a unique 100% barrier against light, water and air, preserving drinks longer.
- Ultra-efficient to transport, lightweight and unbreakable.

## Convenience

- Are perfect when you want a glass and not a bottle.
- Think picnics, on a hike, in a boat, around the pool.
- Have a built in glass and cork screw (take the party with you).

## Recyclable

- Cans are x28 more efficient to recycle than bottles.
- 75% of all aluminium ever produced in the world is still in use today.
- Infinitely recyclable.
