

Coming to the Adelaide Hills, we were amazed with the natural beauty and seemingly perfect environment. This young region has immense potential for premium wine growing because of its cool climate, lean and ancient soils, natural rainfall and sunny, long summer days. This stood out to us as the future of wine in Australia.

The region's ability to grow fruit of immense character, purity and elegance brought us to purchase a former apple and cherry orchard on the steep slopes of the Lenswood subregion. Here we have built our organically certified winery and established a new vineyard pushing the boundaries of viticulture in Australia.

ALEX CO-FOUNDER

B. Physio, CertWHS, MAICD

Alex is a trained physiotherapist with background in business management and work health and safety. She believes responsible businesses should regularly review and improve their processes to ensure all environmental, social, safety and economic procedures are best practice. A wheat farmer's daughter, Alex's heart lies in the country and she loves supporting and being a part of 'the hills' community.

Turon and Alex were married in 2018 and have a two-year-old daughter, Pippa.

TURON WINEMAKER & CO-FOUNDER

B. Oenology (Hons)

Turon graduated from Adelaide University in 2010. Working for various wineries during and after university, he soon identified that the Adelaide Hills was where he ultimately wanted to lay his winemaking hat. He has over 10 years winemaking experience in the Adelaide Hills, working for some premium wine producers. Overseas vintages in Oregon, USA, and Eger, Hungary, has helped to cement Turon's passion for cool climate winemaking.

Turon is a graduate of the Australia Wine Research Institute's Advanced Wine Assessment Course. He is a member of the Adelaide Hill's Wine Show Committee and regularly participates as an Associate Judge in domestic wine shows.

HILLS SERIES

An expression of the Adelaide Hills in a bottle. Fun, yet serious and damn tasty.

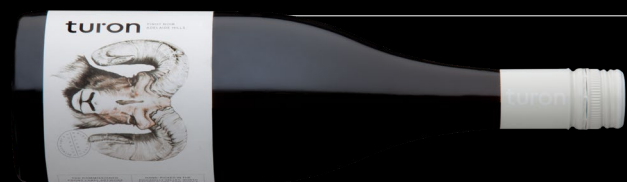

FIELD BLEND

An energetic white blend to brighten your day.

CHARDONNAY

The future of chardonnay. Balanced bright fruit with texture. An intriguing white wine you can deep dive into.

PINOT NOIR

Layers of flavour. A pinot that offers a lot. Have you ever seen something with hooves climb a tree and ask: "how the F&#% did that get there?!" That's pinot.

SYRAH

For people who want to taste the rainbow of what this variety has to offer. The new cool climate king of the jungle.

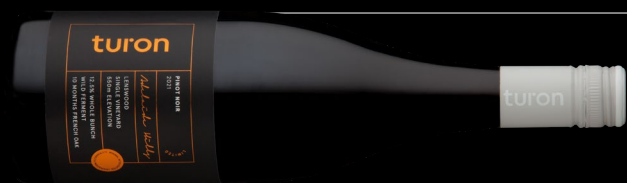

LTD SERIES

Single vineyard wines from distinguished sites in the Adelaide Hills.

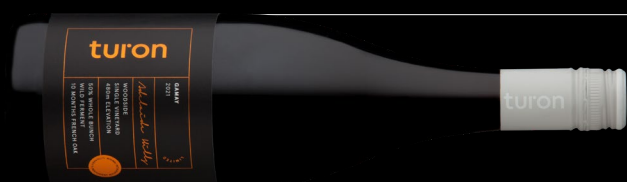

CHARDONNAY

Taking texture to the next level, a fine symphony of citrus fruits, toasty oak, line and length. When you want to get serious and wrap yourself in a blanket of flavour.

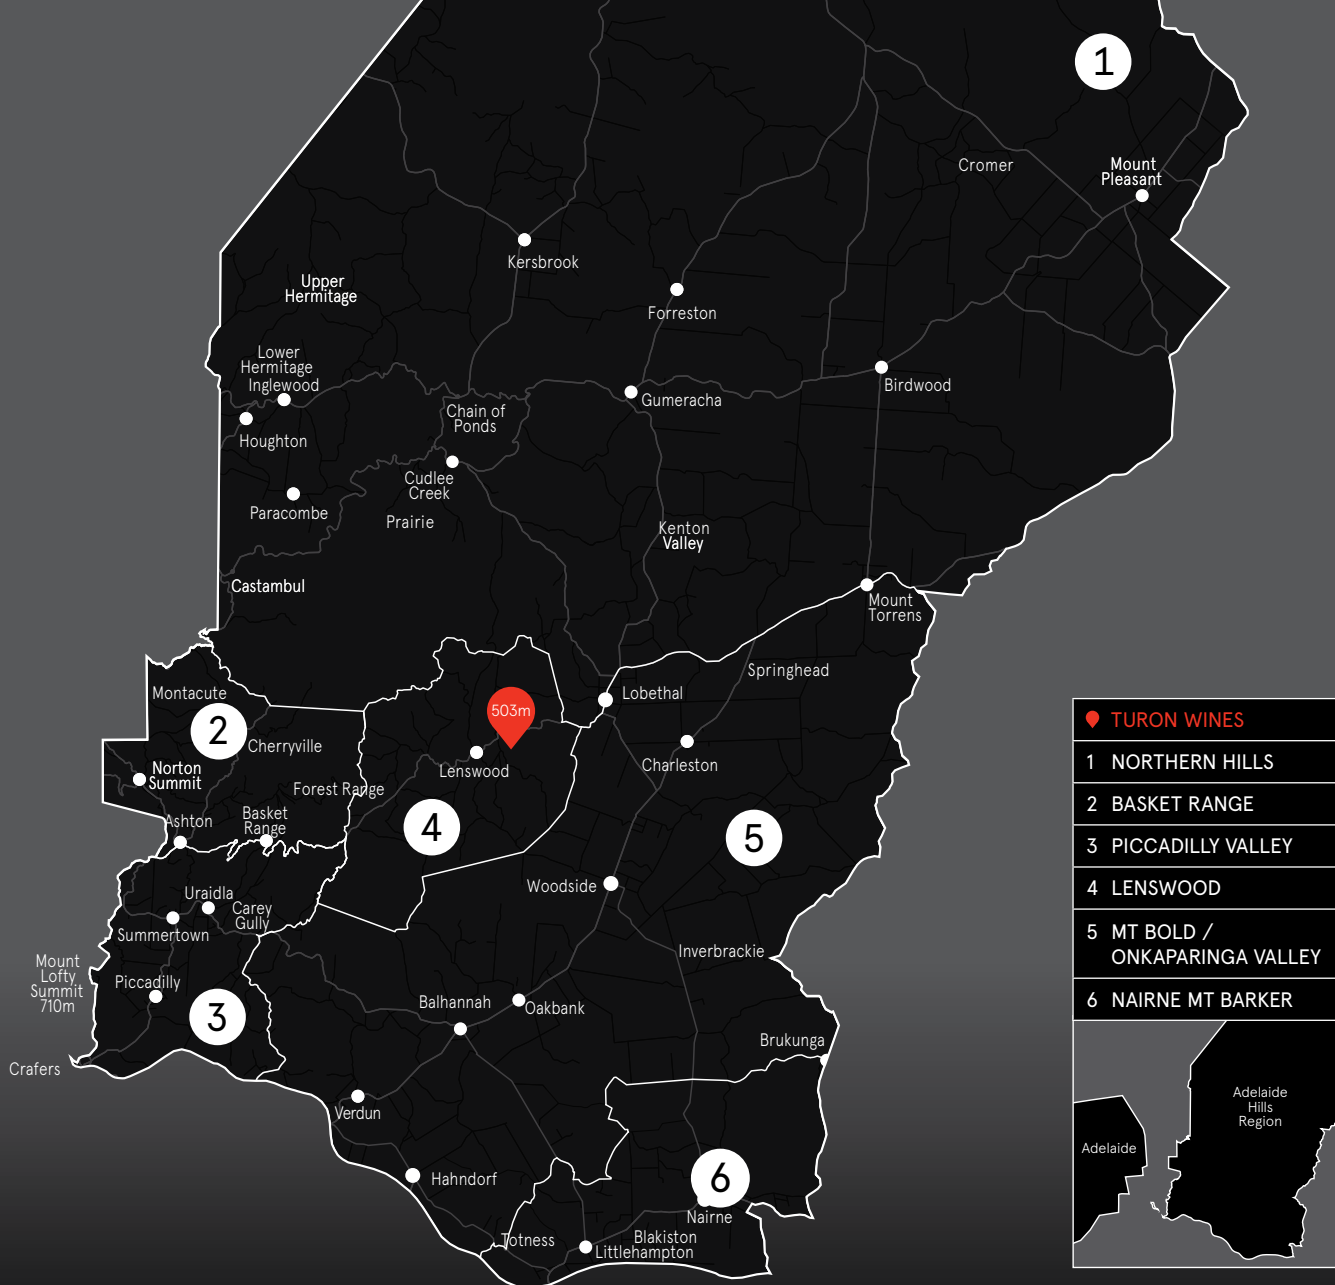

PINOT NOIR

Nuanced flavours, textures and sensations you've never felt before... It's just that good to drink.

GAMAY

An ancient variety, but the new kid on the block, making waves in the Adelaide Hills. Strap yourself in for a spicy perfume-filled ride.

OUR ESTATE

We are located in the subregion of Lenswood in the Adelaide Hills, South Australia. One of only two recognised subregions in the Adelaide Hills.

Our estate is situated a little over 500m above sea level. The property stretches across two separate ridgelines. The steep east-facing slope is our coolest block. The altitude ensures cool nights and its orientation means it gets the daybreak sunlight but avoids the warmer afternoon sun. It is an ideal location for earlier ripening varieties such as pinot noir and chardonnay.

The second ridgeline slopes due north soaking up the morning, midday and afternoon sun. This warmer orientation is ideally suited to growing gamay and syrah. These orientations, matched with the 800 million year old soils, make it a very exciting site for viticulture.

We acknowledge the Peramangk people, Traditional Custodians of the land on which we work and live. We recognise their continuing connection to land, water and community. We pay respect to Elders past, present and emerging.

OUR VINEYARD

We are currently developing a low-yielding, high-density vineyard with biodynamic and organic principles in mind.

Much time and consideration has gone into our vineyard to ensure the varieties we are planting are best suited to the site. Climate data mapping has played a big role in our decision making, particularly comparing our local data to other world class wine growing regions. We have overlayed this information with how our vineyard's slope, soil, orientation and altitude will interact with and influence the fruit development, ensuring we are making the best wines from our unique terroir.

High-density planting creates a better ecosystem in the vineyard, where more moisture is retained and green cover crops sequester carbon into the soil and create a cooler micro-climate. We are also asking each vine to produce less, allowing the vines to put more energy into a smaller crop, which is ultimately better for flavour and quality of fruit.

The Adelaide Hills is one of the few phylloxera-free wine regions in the world, so vines can be grown on their own roots rather than grafted, producing the purest expression of variety.

SUSTAINABLE

Our winery is organically certified and our sustainable certification is currently being processed through Sustainable Winegrowers Australia. We consider all of our actions to do good. Building our own winery and planting our own vineyards has allowed us to plan for the future.

Much thought has been put into sustainable practices in our vineyard and winery development. Our aim of growing fruit in harmony with our environment has meant a great deal of geographical and geological study to ensure the long term suitability of each planting in the vineyard. Our vineyard management practices promote soil carbon storage, micro-flora growth and regenerative agriculture. We also take a sustainable approach in our winery and winemaking practices by ensuring we choose practices that reduce our carbon emissions and waste.

Landcare management is also important to us. We manage a number of native wood lots reducing mono-cropping, promoting biodiversity and sequestering carbon from the atmosphere.

INDEPENDENT

Being a family owned estate has given us ultimate control to be uncompromising in our quality and values. We are constantly chasing perfection and refinement of the grapes we grow and wines we make.

LO-FI

We grow grapes and produce wines with minimal intervention. Our wines express the natural characters of our terroir, showcasing the fruit's vibrancy and purity.

Working for many years in organic and biodynamic vineyards, Turon was naturally drawn to the balance with nature these vineyards had and the attention to detail in the fruit grown, which ultimately led to wines of immense quality and character.

The role of the winemaker is to work with the unique characters of each vineyard and the variabilities of season to produce wines that are a natural reflection of the vineyards they are sourced from.

VEGAN

Our wines are not manipulated. They are approached with a less is more attitude and are vegan by nature.

AWARDS & RECOGNITION

2021 MATTHEW JUKES, UK

Hills Series Field Blend 2020, 18/20, Matthew Jukes, 2021.
Hills Series Chardonnay 2020, 18/20, Matthew Jukes, 2021.
Limited Series Chardonnay 2019, 17.5/20, Matthew Jukes, 2021.
Hills Series Pinot Noir 2020, 17/20, Matthew Jukes, 2021.
Limited Series Pinot Noir 2019, 17.5/20, Matthew Jukes, 2021.
Limited Series Pinot Noir 2020, 18.5/20, Matthew Jukes, 2021.
Hills Series Syrah 2019, 18/20, Matthew Jukes, 2021.
Hills Series Syrah 2018, 17.5/20, Matthew Jukes, 2021.
Limited Series Syrah 2019, 18/20, Matthew Jukes, 2021.
