

## SCOS Parking – Version 2.13+

---

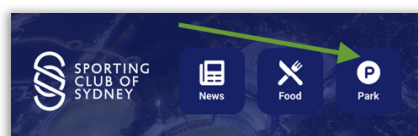

**SCOS Members and their guests are required to check-in their vehicle's registration details when parking on Driver Avenue or EP3 and using the Sporting Club fitness facilities.**

Users are entitled for up to three hours free parking at any one time. There is a six-hour exclusion period from the time a user's parking ends (i.e., the user 'leaves the car park' via the App , or the three-hour free period expires).

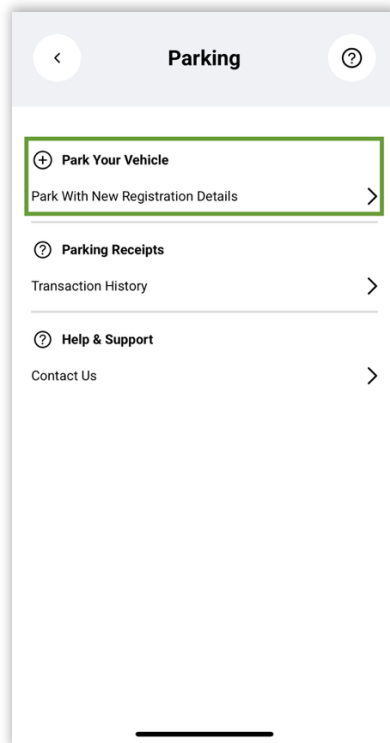

In SCOS App (v2.13 or later), users' five most-recently-used registration details are stored, for quicker parking upon a following visit.

### **HOW TO PARK (NEW REGISTRATION DETAILS)**

1. Open the SCOS App and navigate to the 'Park' screen, accessed via the home page.

2. To park with new registration details, tap “Park With New Registration Details” – this is to be used for first-time users or for when users are parking with registration details they have not previously used before.

3. Enter the registration details, select the correct state of registration and press **Start Parking**. Then, **Confirm** the details are correct to commence the parking.

Start Parking

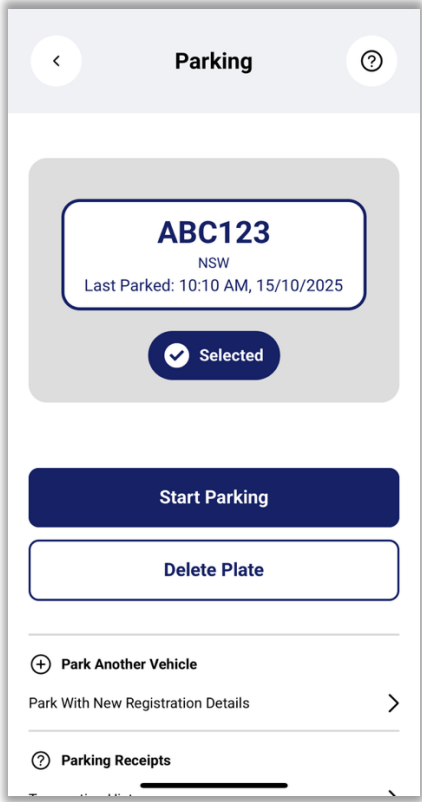

4. The car is **'Parking Now'**, and the user can see how much free parking time remains.

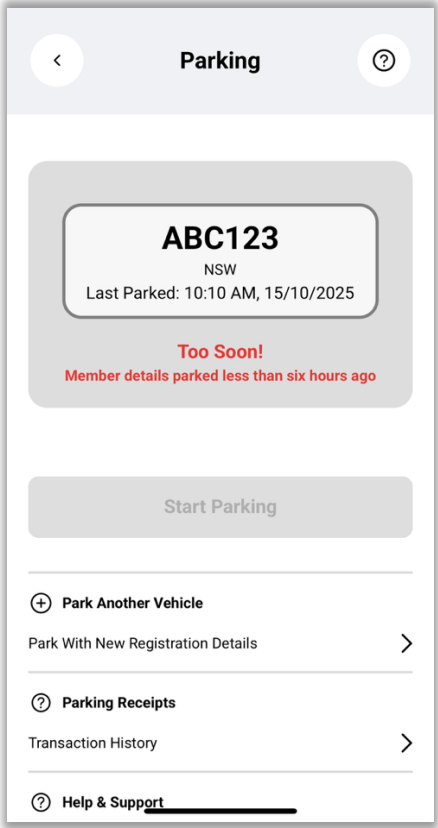

5. When finished, the user can **Leave Car Park**. Users must confirm their decision to leave the car park, to avoid mis-clicks.

6. This car has now stopped parking. When selected, the user can now choose to remove the registration details from their device by clicking **Delete Plate**. The **Last Parked** time is now updated to reflect the most-recent parking session.

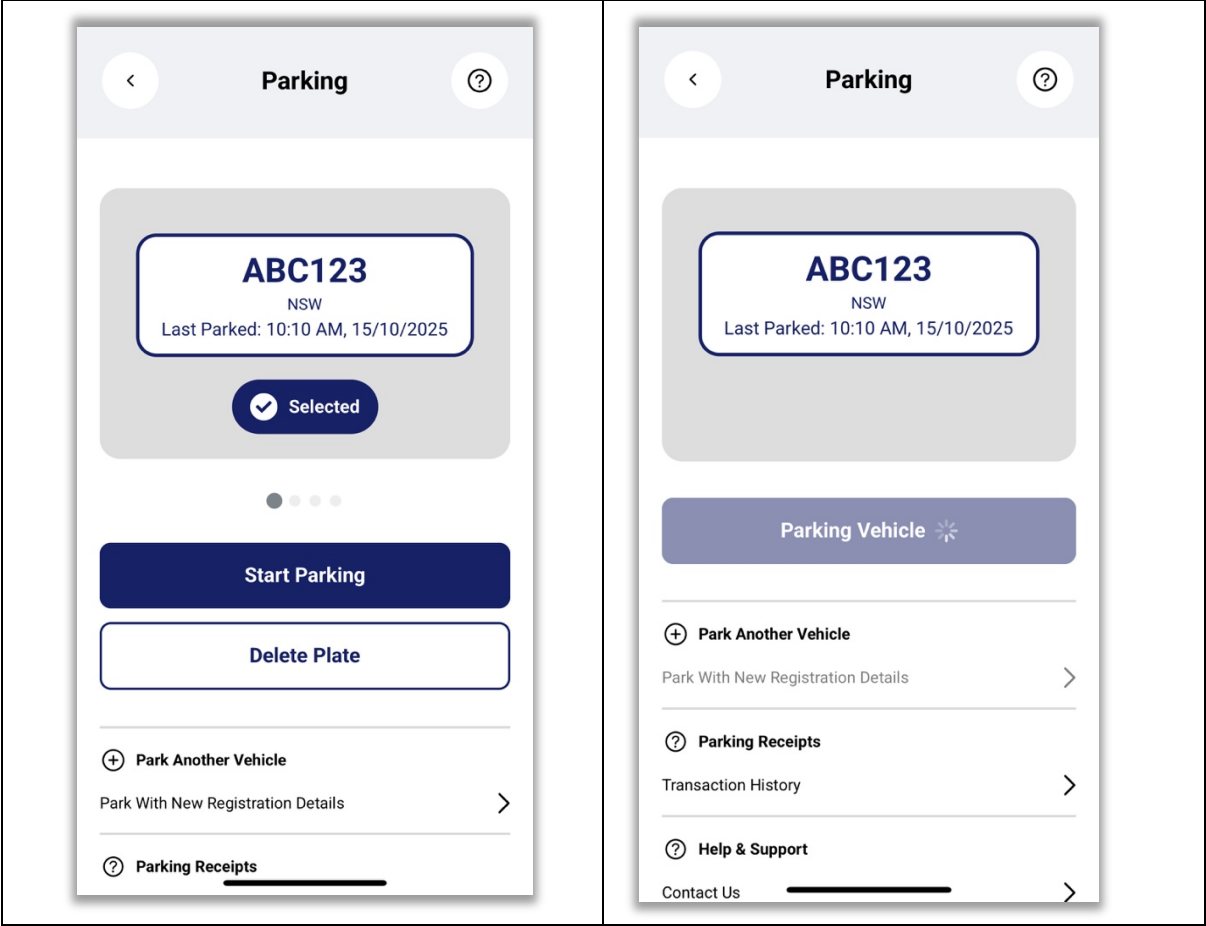

7. The user will face a ‘Too Soon’ error if they choose to **Start Parking** within the six-hour exclusion period.

HOW TO PARK (EXISTING REGISTRATION DETAILS)

- 1. Tap the registration details of the vehicle and then, **Start Parking**. NOTE: The vehicle is not registered as parking until the **Start Parking** has been pressed and the confirmation message is received.

2. **Success!** The vehicle is 'parked' and registration details have been correctly logged.
