

# Watercare Laboratory Services

# DRINKING WATER TESTING

Our accredited analytical laboratory provides a complete testing service and peace of mind.

Watercare Laboratory is one of New Zealand's leading analytical laboratories processing over 30,000 drinking water samples per year. We understand the critical importance of drinking water to communities and offer our considerable expertise to meet the analytical requirements of the drinking water industry. We provide a one stop shop with a complete range of catchment and drinking water testing services at competitive prices throughout New Zealand.

## When quality matters

At Watercare Laboratory Services, we take quality seriously. We believe that we can add value to our customers business by catering to their individual needs. With fast turnaround solutions and competitive pricing, we endeavour to meet customer needs, and exceed their expectations.
